Supplemental Cash Flow Information (Note 25)

1. Corporate Information and Nature of Operations

Monument Mining Limited ("Monument" or "the Company") is a Vancouver based gold producer, engaged in the operation of gold mines and acquisition, exploration and development of precious metals and other base metals mineral properties with a focus on gold. The Company is incorporated and domiciled under the Canada Business Corporations Act and listed on the Toronto Stock Venture Exchange ("TSX-V: MMY") and Frankfurt Stock Exchange ("FSE: D7Q1") with the head office located at 1100 Melville Street, Suite 1580, Vancouver, British Columbia, Canada V6E 4A6.

The Company's 100% owned Selinsing Gold Mine is located in Pahang State, Malaysia, and has been in commercial production since September 2010. The Company's exploration and development mineral assets are 100% owned through its subsidiaries, including the Selinsing gold portfolio in Pahang State, Malaysia comprised of the Selinsing, Buffalo Reef, Felda Land and Famehub projects (together "Selinsing"), and Murchison gold portfolio in Western Australia ("WA") comprised of the Burnakura, Tuckanarra and Gabanintha projects; and the Mengapur Polymetallic Project ("Mengapur") in Pahang State, Malaysia.

The condensed consolidated interim financial statements of the Company for the period ended March 31, 2017 comprising the Company and its subsidiaries are presented in thousands of United States ("US") dollars and all values are rounded to the nearest thousand dollar except per share amounts or where otherwise indicated.

These unaudited condensed consolidated interim financial statements were approved by the Board of Directors of the Company on May 27, 2017.

2. Basis of Preparation

These unaudited condensed consolidated interim financial statements have been prepared in accordance with IAS 34 – Interim Financial Reporting ("IAS 34") as issued by the International Accounting Standards Board ("IASB"). Accordingly, certain disclosures included in annual financial statements prepared in accordance with International Financial Reporting Standards ("IFRSs") as issued by the IASB have been condensed or omitted. These unaudited condensed interim consolidated financial statements should be read in conjunction with the Company's audited consolidated financial statements for the year ended June 30, 2016 which have disclosed a detailed discussion of the Company's significant accounting policies along with significant accounting estimates and judgments used or exercised by management in the preparation of theses financial statements. A summary of significant accounting policies are presented in Note 3 and have been consistently applied in each of the periods presented.

These condensed consolidated interim financial statements were prepared on a going concern basis under the historical cost method except for certain derivatives, which are measured at fair value.

3. Significant Accounting Policies

The interim financial statements have been prepared in accordance with the accounting policies adopted in the Company's most recent annual financial statements for the year ended June 30, 2016 except where otherwise indicated

a) Critical accounting estimates and judgments

When preparing interim financial statements, management makes a number of judgments, estimates and assumptions in the recognition and measurement of assets, liabilities, income and expenses. Actual financial results may not equal the estimated results due to differences between estimated or anticipated events and actual events. The judgments, estimates and assumptions made in the preparation of these condensed interim consolidated financial statements were similar to those made in the preparation of the Company's annual financial statements for the year ended June 30, 2016.

b) New and amended standards and interpretations

Effective for future annual periods

<u>IAS 12 – Income taxes: Recognition of Deferred Tax Assets for Unrealised Losses ("IAS 12")</u>

IAS 12 has amendments to clarify the accounting for deferred tax assets for unrealised losses on debt instruments measured at fair value. The amendments clarify that an entity needs to consider whether tax law restricts the sources of taxable profits against which it may make deductions on the reversal of that deductible temporary difference. Furthermore, the amendments provide guidance on how an entity should determine future taxable profits and explains in which circumstances taxable profit may include the recovery of some assets for more than their carrying amount. Application of the standard is mandatory for annual periods beginning on or after January 1, 2017. The Company is evaluating any potential impact of this standard.

(in thousands of United States dollars, except share and per share amounts or otherwise stated)

IFRS 9 – Financial Instruments ("IFRS 9")

IFRS 9 will replace IAS 39 "Financial Instruments: Recognition and Measurement" (IAS 39). IFRS 9 utilizes a single approach to determine whether a financial asset is measured at amortized cost or fair value and a new mixed measurement model for debt instruments having only two categories: amortized cost and fair value. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. It also introduces a new expected loss impairment model and limited changes to the classification and measurement requirements for financial assets. Application of the standard is mandatory for annual periods beginning on or after January 1, 2018, with early application permitted. The Company is evaluating any potential impact of this standard.

IFRS 15 – Revenue from Contracts with Customers ("IFRS 15")

IFRS 15 will replace IAS 18, "Revenue", IAS 11, "Construction Contracts", and related interpretations on revenue. IFRS 15 establishes a single five-step model framework for determining the nature, amount, timing and uncertainty of revenue and cash flows arising from a contract with a customer. Application of the standard is mandatory for annual periods beginning on or after January 1, 2018, with early application permitted. The Company is evaluating any potential impact of this standard.

IFRS 16 – Leases ("IFRS 16")

IFRS 16 will replace IAS 17, "Leases". IFRS 16 provides a single lessee accounting model, requiring lessees to recognize assets and liabilities for all leases unless the lease term is 12 months or less or the underlying asset has a low value. Application of the standard is mandatory for annual periods beginning on or after January 1, 2019, with early application permitted. The Company is evaluating any potential impact of this standard.

	$	$
Cash and cash equivalents	4,083	11,279
Restricted cash	9,631	9,634
	13,714	20,913

Cash at banks earns interest at floating rates based on daily bank deposit rates.

As at March 31, 2017, the Company has restricted cash of $9.63 million (June 30, 2016: $9.63 million), which represents $0.19 million (June 30, 2016: $0.19 million) issued letters of credit as guarantees for custom duties and certain equipment, and $9.44 million (June 30, 2016: $9.44 million) set aside in a custodian bank account pursuant to a Shah Alam High Court Order, issued in relation to the litigation "SMSB vs Monument". The restricted cash is the subject of an interlocutory relief pending determination of the full trial; it is not an indicative settlement of legal liability, neither in nature nor in quantity.

On October 10, 2012, Selinsing Mining Sdn. Bhd. ("SMSB") filed a Writ and Statement of Claim against Monument and its wholly-owned subsidiaries, Selinsing Gold Mine Manager Sdn. Bhd. ("SGMM") and Able Return Sdn. Bhd. ("Able") (together "Monument"), claiming, among other things, a "5% Participating Joint Venture interest" from two of the tenements of Monument's Selinsing Gold Mine. SMSB was the previous sub-lease holder and operator that sold the Selinsing Gold Mine to Monument and its subsidiaries free and clear of any encumbrances. The transaction was closed on June 25, 2007 and SMSB was paid in full. SMSB did not make its claim in relation to the purported "Participating Joint Venture Interest" until October 2012. Monument denies that SMSB has any joint venture interest in the Selinsing Gold Mine and intends to continue to vigorously defend this claim which has no merit.

Monument and its Malaysian subsidiary has filed suit in Kuantan High Court against Kesit Pty Ltd. and Peter Steven Kestel, claiming for ownership of the 100% issued shares of SMSB by virtue of the "Able/Selinsing Purchase Agreement" dated May 31, 2007. The entire 100% of SMSB issued shares are now held by Kesit Pty Ltd., a company owned and controlled by Peter Steven Kestel. Peter Steven Kestel is also one of the Directors of SMSB.

a) Selinsing Gold Portfolio

The Company has a 100% interest in the Selinsing Gold Exploration and Evaluation Portfolio including Selinsing Deep, a part of Buffalo Reef, Felda Land and Famehub, which lie continuously and contiguously along the gold trend upon which the Selinsing Gold Mine is located. As of March 31, 2017 the Selinsing Gold Portfolio totalled $27.03 million that was comprised of $2.07 million for Selinsing Deep, $17.01 million for Buffalo Reef, $2.90 million for Felda Land and $5.05 million for Famehub.

<u>Selinsing Deep</u>

The Company acquired a 100% interest in the Selinsing Gold Project in 2007 through its 100% owned subsidiary Able Return Sdn. Bhd. and since then some deposits across those projects have been developed into a production and have been classified to property, plant and equipment (Note 8(a)). Continuing expenditure underneath these deposits (“Selinsing Deep”) is recorded against exploration and evaluation with expenditures of $0.26 million incurred in the current fiscal year.

<u>Buffalo Reef</u>

On June 25, 2007, the Company acquired 100% of the common shares of Damar Consolidated Exploration Sdn. Bhd., a company incorporated under the laws of Malaysia, thereby effectively acquiring 100% of the Buffalo Reef tenement property interests. Some deposits at Buffalo Reef have been placed into production and are recorded within property, plant and equipment (Note 8(a)). The Mengapur Project has been placed into care and maintenance with intention to apply Intec Technology in testing sulphide copper metal recovery on site upon completion of the Intec trial test work on sulphide gold ore at the Company's Buffalo Reef property. Exploration and evaluation expenditures of $0.59 million were incurred in the current fiscal year for Mengapur care and maintenance, which includes $0.25 million of amortization.

MMSB is the exclusive operator of the Mengapur Project. It entered into a Harmonization Agreement with Phoenix Lake Sdn. Bhd. ("PLSB") and ZCM Minerals Sdn. Bhd. Another application for a mining lease over the prospecting land was also submitted in August 2012. 12. Capital Management

The Company manages its capital to ensure that it will be able to continue to meet its financial and operational strategies and obligations, while maximizing the return to shareholders through the optimization of equity financing. Management continuously monitors its capital position and periodically reports to the Board of Directors.

The Company is sensitive to changes in commodity prices and foreign exchange. The Company's policy is to not hedge gold sales. The Company's capital management policy has not changed in the 2017 fiscal year.

The Company's objectives when managing capital are to:

- Ensure the Company has sufficient cash available to support the mining, exploration, and other areas of the business in any gold price environment;
- Ensure the Company has the capital and capacity to support a long-term growth strategy; and
- Minimize counterparty credit risk.

Other than restricted cash (Note 4) the Company is not subject to any externally imposed capital restrictions. Monument has the ability to adjust its capital structure by issuing new equity, issuing new debt, and by selling or acquiring assets. 13. Financial Instruments and Financial Risk

The Company's financial instruments are classified as loans and receivables (cash and cash equivalents, restricted cash and trade and other receivables, financial assets at fair value through profit or loss (FVTPL) (marketable securities) and other financial liabilities (accounts payable and accrued liabilities).

a) Fair value measurement

The carrying amounts of cash and cash equivalents, restricted cash, trade and other receivables and other financial liabilities – accounts payable and accrued liabilities are considered reasonable approximations of their fair values due to the short-term nature of these instruments.

The Company does not have any financial assets or financial liabilities measured for fair value on a recurring basis.

b) Risk exposures and responses

The Company's financial instruments are exposed to market risk, credit risk, and liquidity risk.

Market risk
Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk is comprised of three types of risk: foreign currency risk, price risk and interest rate risk.

Foreign currency risk

The Company is exposed to foreign currency risk to the extent financial instruments held by the Company are not denominated in US dollars.

At the reporting date, the Company is exposed to foreign currency risk through the following assets and liabilities denominated in Malaysian ringgit (RM), Australian dollar (AUD) and Canadian dollar (CAD):

	March 31, 2017			June 30, 2016		
	$	$	$	$	$	$
(in 000's, US dollar equivalent)	AUD	RM	CAD	AUD	RM	CAD
Financial instrument – assets						
Cash and cash equivalents	101	132	458	335	286	1,894
Restricted cash	-	189	-	-	192	-
Trade and other receivable	17	982	15	31	1,100	19
Financial instruments – liabilities						
Accounts payable and accrued liabilities	(386)	(3,978)	(266)	(1,288)	(4,632)	(209)

The Company has not hedged any of its foreign currency risks. The derivative components associated with foreign currency fluctuation are fair valued at each reporting date and gains or losses are recorded in profit or loss.

Based on the above net exposures as at March 31, 2017 and assuming that all other variables remain constant, a 5% depreciation or appreciation of the RM against the US dollar would result in an increase/decrease of approximately $0.13 million (June 30, 2016 – $0.15 million) in the Company's net income, a 5% depreciation or appreciation of the CAD against US dollar would result in an increase/decrease of approximately $0.01 million (June 30, 2016 – increase/decrease $0.09 million) in net income and a 5% depreciation or appreciation of the AUD against the US dollar would result in an increase/decrease of approximately $0.01 million (June 30, 2016 – increase/decrease $0.05 million) in net income.

Price risk

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices other than those arising from interest rate risk or foreign currency risk. The Company has not hedged any of its commodity price risks.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market interest rates. Generally, the Company's interest income will be reduced during sustained periods of lower interest rates as higher yielding cash equivalents and short-term investments mature and the proceeds are reinvested at lower interest rates. The converse situation will have a positive impact on interest income.

(in thousands of United States dollars, except share and per share amounts or otherwise stated)

To limit interest rate risk, the Company uses a restrictive investment policy. The fair value of the investments of financial instruments included in cash and cash equivalents is relatively unaffected by changes in short-term interest rates. The investments are generally held to maturity and changes in short-term interest rates do not have a material effect on the Company's operations.

Credit risk

The Company's credit risk on trade receivable is negligible and the balances were collected subsequent to end of reporting period.

The Company is exposed to concentration of credit risk with respect to cash and cash equivalents (Note 4). The maximum exposure to credit risk is the carrying amounts at March 31, 2016. The amount of $9.82 million (June 30, 2016: $10.68 million) is held with a Malaysian financial institution, $0.10 million with an Australian financial institution (June 30, 2016: $0.33 million) and $3.79 million (June 30, 2016: $9.90 million) is held with Canadian financial institutions.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company manages liquidity risk through budgeting and forecasting cash flows to ensure it has sufficient cash to meet its short-term requirements for operations, business development and other contractual obligations. The Company's cash and cash equivalents are highly liquid and immediately available on demand for the Company's use. The table below summarizes the maturity profile of the Company's non-derivative and derivative financial liabilities as at March 31, 2017.
