

MINING WITH INTEGRITY, DELIVERING VALUE

TSXV: MMY

FSE: D7Q1

Monument Mining Limited (TSXV: MMY; FSE: D7Q1) is an established Canadian publicly listed company, a growth focused gold producer and mining asset developer. Monument owns the operating Selinsing Gold Mine in Malaysia and the Murchison Gold Project in Western Australia, which includes a former producing site with infrastructure, and a large prospective land position.

Gold focus, Multiple Countries, Investing in Growth & Development

- **Gold Portfolio**
 - Selinsing Gold Mine: Sulphide gold processing plant for gold concentrate production
 - Murchison Gold Project: Unlocking strategic value; exploration potential and M&A opportunities
 - Focused on business development opportunities to increase total group production
- **Investment Profile**
 - **Selinsing Gold Mine in Malaysia**
 - 16 years in production for approx. 426.5koz with US\$661m revenue, Net cash from production of \$413m (up to September 30, 2025)
 - Project to date cash costs of US\$634/oz (up to September 30, 2025)
 - NI 43-101 Mineral Resources of 880 Koz including Reserves of 267 Koz Au at 1.45 g/t (Jan. 2019)
 - Sulphide gold processing plant began commercial production in Sept. 2023
 - Exploration potential both near-surface and underground
 - **Murchison Gold Project in Western Australia**
 - 644 Koz Au historical JORC Mineral Resources at time of acquisitions
 - 381 Koz Au NI43-101 Mineral Resources at Burnakura with 293 Koz Indicated, 88 Koz Inferred
 - Fully operational 108-person camp and 260Ktpa Gold Processing Plant on care & maintenance
 - Opportunity to make new gold discoveries, test for extensions of known mineralization to increase the resource base
 - Exploration potential both near-surface and underground
 - **Able to fund business/operation expansion**
 - Cash Balance US\$62.84m (September 30, 2025)

Success Factors

- Proven leadership
- Growing gold portfolio
- Operating in multiple regions
- Successful gold producer
- Upside exploration potential
- Sound technical team
- Continuing stakeholders' support

SELINSING GOLD MINE

The Selinsing Gold Mine includes the Selinsing, Buffalo Reef, Felda, Peranggih and Famehub properties. Mineral Resources & Reserves show Selinsing as a sulphide gold rich project (see NI 43-101 Technical Report Prepared by Snowden, filed Jan. 31, 2019, on SEDAR). In June 2023, first gold concentrate shipments and sales began from the flotation plant, and commercial production began in September 2023. Expansion drilling programs currently underway at Selinsing aiming to increase gold resources to potentially expand the life of mine.

MURCHISON GOLD PROJECT

The Murchison Gold Project comprises the Burnakura, Gabanintha, and Tuckanarra (20% free carried interest) properties in Western Australia. Monument has been systematically performing the necessary work to validate the historical Resources and discover new Resources to continue updating the current Mineral Resources under NI43-101 guidelines. At the Burnakura site there is an operational 260KTPA gold processing plant, 118 man mine camp, and all the necessary infrastructure. Drill programs include Phase 1 (completed) to test new structural targets southwest of Burnakura; results include high-grade gold at Junction Target (3m at 10.2 g/t including 1m at 27.3 g/t from hole 21BNAC213). Phase 2 (completed) to test for extensions to known mineralization and resources at the NOA1, NOA2, NOA7/8 and Alliance target areas; RC drilling encountered multiple mineralization horizons at depth at NOA1, including 4m at 32.0g/t Au from 218m from hole 21BNRC050. DD drilling confirmed the extension of gold mineralization below the current Mineral Resource at the North of Alliance ("NOA") group of deposits. The Company is assessing the potential production restart at the Murchison Gold Project.
